**WORKPLAN APPROVAL - REMEDIATION OF SHALLOW SOILS CONTAINING ARSENIC,
BOEING REALTY CORPORATION, FORMER C-6 FACILITY, PARCEL A, 19503
NORMANDIE AVENUE, LOS ANGELES (FILE NO. 95-036)**

Dear Mr. Mossman:

We have reviewed the "Workplan to Perform Shallow Soil Remediation Excavation Activities – Parcel A" (Workplan) dated September 2, 2003, prepared by Haley & Aldrich, Incorporated. The Workplan presents the rationale and procedures for the remediation of shallow soils containing concentrations of arsenic above the previously established health-based remediation goal (HBRG) of 14 milligrams per kilogram (mg/kg). The Boeing Realty Corporation (BRC) proposes to excavate soils exceeding 14 mg/kg, collect soil confirmation samples, and dispose of the excavated soils in accordance with the Site-wide Soil and Waste Management Plan.

Please submit a report presenting the results of this soil remediation effort to the Regional Board by March 31, 2004. Please call me at (213) 576-6737 if you have any questions.

Sincerely,

John Geroch
Associate Engineering Geologist
Site Cleanup Unit I
